"Technology Facilitation Mechanism" (TFM) in order to support the implementation of the Sustainable Development Goals (SDGs). The TFM will facilitate multi-stakeholder collaboration and partnerships through the sharing of information, experiences, best practices and policy advice among Member States, civil society, the private sector, the scientific community, United Nations entities and other stakeholders.
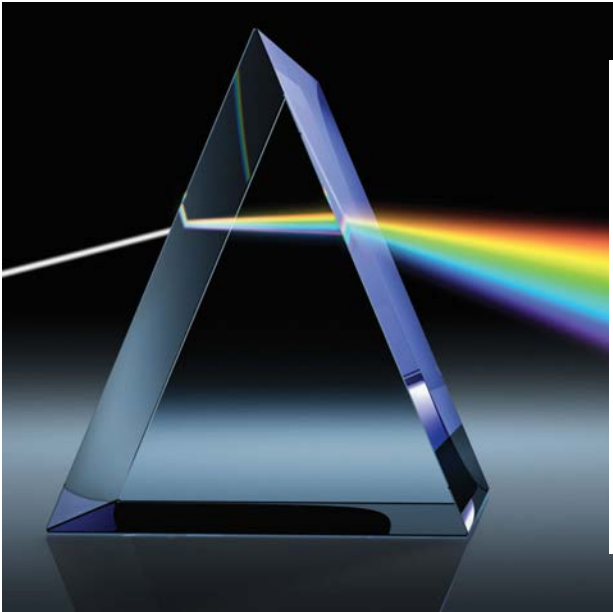

Co-Chair, Dr. Agnes Kijazi (Tanzania),
Co-Chair; Dr. Vaughan Turekian (United States of America),

Dr. Heide Hackmann (South Africa),
Dr. Huodong Guo (China),
Dr. Michiharu Nakamura (Japan),

Sustainability across the National Academies:
Linking Knowledge with Action

This newsletter presents a monthly update highlighting activities related to sustainability throughout the National Academies of Sciences, Engineering, and Medicine, with relevance to the Sustainable Development Goals (SDGs) adopted at the United Nations in 2015. The SDGs include 17 goals, targets, and indicators covering a broad array of sustainable development issues, ranging from eradicating poverty and making cities more sustainable to addressing climate change.

In this issue:

- Zero Hunger
- Good Health and Well-Being
